This case carries considerable interest in view of the fact that it involves the validity of the present ordinance.

## ROPING CONTEST CALLED OFF.

The roping contest which was to have taken place at the Don Luis ball park Sunday next, has been postponed on account of the inclemency of weather and the purpose could not be secured. Clay McConagill, the champion steer tier of New Mexico, was arranging for the contests, and will probably return to the district at some later time in the winter.

## MINING NOTES.

Salt Lake City.—Owing to the trouble over the smoke nuisance from the smelters, it is stated that the Utah Consolidated Co. has decided to move its plant and the Bingham Consolidated will probably follow the example. They are said to be the two worst offenders in the valley. If they are removed it is possible that the American Smelting & Refining Co. and the United States Refining Co. will make a compromise with the farmers. It is probable that the two smelters will locate on the southwestern shore of the Great Salt Lake.

Butte, Mont.—The strike in the Ophir mine, owned by the Butte Central & Boston Copper Corporation, which was made on the 300-foot level, has been opened down to a depth of 500 feet, thus establishing its permanent character. The vein at the lower point is several feet and carries 7 per cent of copper and 500 ounces of silver. A company has been organized with a capital of \$20,000 to form a mining exchange in this city. It will be the first one ever established here.

A deal is reported in progress involving the transfer of the Phoenix mine holdings.

Anaconda has opened a body of glance in the lower levels of its high ore property that may make it the most valuable opening on the Butte hill.

Calumet & Arizona now has its reserves of ore about double what they were a year ago and with this the future of the property seems more secure than it has ever previously been.

Last week's dividend of \$1.50 per share was the fifth to be announced by the Copper Range company, subsidiary to the Copper Range Consolidated, and was the third for the present year.

The United Metals Selling company, handling upwards of 600,000,000 pounds of copper annually, has just advanced its price for electrolytic copper to 23 1/4 cents a pound.

The new compressor for Winona and King Philip has been received. When installed, the Winona scale of operations will be considerably broadened. The December mineral production will exceed 100 tons.

A new body of high grade ore has been encountered in the Superior & Pittsburg at the Hoatson mine. It is on the twelfth level and resembles very greatly and is alongside the Lowell ore body of the Copper Queen.

It has been rumored that General Manager MacNaughton of the Calumet & Hecla was to resign that position and assume the general management of the Greene-Canaan property. There is no foundation in fact for this report.

Cochise shareholders state that they intend to elect by the property. They believe that a consolidation into a large company would be far from a bad thing, and they believe that the future would be far more broad than is possible in the present state of affairs. Those who are close to the management state that the management itself is in this frame of mind.

The threatened production of the many big companies which are gradually being built up all over the United States will eventually force copper lower, but it will not be in a day or in two days that this will be accomplished. Before the giant productions of many companies become features of the market, there will be time for at least another year of high copper prices. When the increase in production does come it will come gradually and with the increase will come the expansion of demand. If copper demand can maintain its present rate at current prices how high will it go when copper becomes cheaper? This is a question that cannot be readily answered until the scope of the prosperity prevailing in the country at the
